

2020 Announcement of Food and Beverages Conference

Mükerrem Kaya

Professor, Department of Food Engineering, Ataturk University, Turkey, E-mail: mkaya@atauni.edu.tr

Food science is the branch of science that works to create and maintain a wholesome food supply for the general public. If you think about these different pieces, it's clear that food science is inherently related to biology, chemical engineering, biochemistry, nutrition, animal science, and microbiology. Food Science is a multi-disciplinary field involving chemistry, biochemistry, nutrition, microbiology and engineering to give one the scientific knowledge to solve real problems associated with the many facets of the **food system**. Food science is the study of the physical, biological, and chemical makeup of food; and the concepts underlying food processing. **Food technology** is the application of **food science** to the selection, preservation, processing, packaging, distribution, and use of safe food.

The **Euro Food 2020** is an event that aims to explore the ways to innovate in the field of Food Science, and to find new catalysts for better food industrial development at **Berlin, Germany on February 26-27, 2020**. The conference will serve as a platform to bring together leading food scientist with different specialties such as Food Analyst, Nutritionists etc. Euro Food 2020 Congress will discuss on the topics such as **Food Biotechnology**, Food Chemistry, Food Technology, Botany, Agriculture, Microbiology and Beverage Technology.

Euro Food 2020 Congress supported by the organizing committee network of renowned scientific and professional expert such as **Dr. Mukerrem Kaya**, Food Engineering Department, Atatürk University, Turkey, **Dr. Topwe Milongwe MWENE-MBEJA**, Department of Chemistry, University of Lubumbashi, Democratic

Republic of the Congo, **Dr. Juming Tang**, Distinguished Chair of Food Engineering, Department of Biological Systems Engineering, Washington State University, USA, it provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in Food and Beverages.

Agriculture, food, and related industries contributed \$1.053 trillion to U.S. gross domestic product (GDP) in 2017, a 5.4-percent share. The output of America's farms contributed \$132.8 billion of this sum-about 1 percent of GDP. China is the largest contributor followed by US.

Global Food and Beverages Conferences going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More..!!!
